

transmission code of the disturbed one of the first physical radio channel and the second physical radio channel is changed.

12. A method for changing radio channels in a mobile radio communication system as claimed in claim 7, wherein each available radio channel
5 of the mobile radio communication system can be used both as a first physical radio channel and as a second physical radio channel.

REMARKS

- The present amendment makes editorial changes and corrects typographical errors in the specification in order to conform the specification to the requirements
10 of the United States Patent practice. No new matter is added thereby. Original claims 1-6 have been canceled in favor of new claims 7-12. Claims 7-12 have been presented solely because the revisions by bracketing and underlining which would have been necessary in claims 1-6 in order to present those claims in accordance with preferred United States Patent practice would have been too extensive, and thus
15 would have been too burdensome. The amendment is intended for clarification purposes only and not for substantial reasons related to patentability pursuant to 35 U.S.C. §§101, 102, 103 or 112. Indeed, the cancellation of claims 1-6 does not constitute an intent on the part of the Applicant to surrender any of the subject matter of claims 1-6.
